

Greetings, Everyone

We are excited to share with you that IEEE PES 2023 and IEEE AIUB SB are delighted to present you with a webinar supported by IEEE AIUB Student Branch that combines two separate themes on a global concern, Climate Change and Waste Management and Recycling.

Don't miss out on this chance to learn more and prepare to change the world by joining us.

**Registration Fee – Free**

**Date -14<sup>th</sup> May 2023**

Time

**1.Climate Change –**

The causes of the increase in global temperature, the destruction of various habitats, the decline in drinkable water supplies, the rise in air pollution, the decrease in food supplies, the causes of some health problems, the growth in greenhouse gas emissions due to human activity, etc. will be discussed as this topic comes to a close.

**Speaker –**

**Time:**

**2.Waste Management & recycling**

This discussion will center on the idea that the most straightforward way to cut waste is to modify our manufacturing processes to match our consumption habits. The five R's of waste management are the key focus. reducing, reusing, recycling, recovering, and managing leftovers.
